QUESTION 1 You are building an ADO.NET Entity Framework application. You need to validate the conceptual schema definition language (CSDL), store schema definition language (SSDL), and mapping specification language (MSL) files. Which Entity Data Model tool can you use? (Each correct answer presents a complete solution. Choose all that apply.) A. EDM Generator (EdmGen.exe) B. ADO.NET Entity Data Model Designer C. Entity Data Model Wizard D. Update Model Wizard Answer: AB Explanation: EdmGen.exe (<http://msdn.microsoft.com/en-us/library/cc716721.aspx>) ADO.Net Entity Data Model Designer ([http://msdn.microsoft.com/enus/library/vstudio/cc716685\(v=vs.100\).aspx](http://msdn.microsoft.com/enus/library/vstudio/cc716685(v=vs.100).aspx)) The Entity Data Model wizard creates the .edmx files. It does not validate the CSDL, SSDL or MSL files. The Update Model wizard updates the .edmx file after changes have been made. It does not validate the CSDL, SSDL or MSL files. QUESTION 2 Drag and Drop Question You are developing an ASP.NET Web API action method. The action method must return the following JSON in the message body. { "Name": "Fabrikam", "Vendor Id": 9823, "Items": ["Apples", "Oranges"] } You need to return an anonymous object that is serialized to JSON. What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

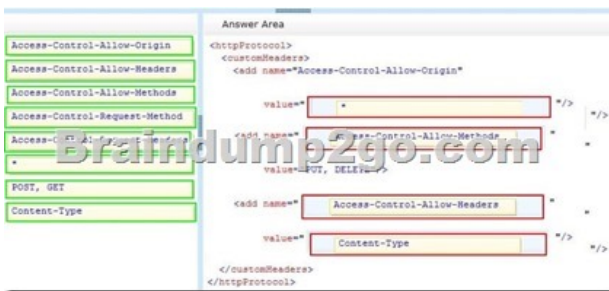

Answer:

```
public object Get()
{
    return new
    {
        Name = "Fabrikam", VendorNumber = 9823,
        Items = new List<string> { "Apples", "Oranges" }
    };
}
```

QUESTION 3 You are designing an ASP.NET Web API application. You need to select an HTTP verb to allow blog administrators to moderate a comment. Which HTTP verb should you use? A. GET B. POST C. DELETE D. PUT
QUESTION 4 Drag and Drop Question You are developing an ASP.NET Web API application that will be consumed by a web browser via a composite application that is served from another web domain. You need to configure the Web API. What should you do? (To answer, drag the appropriate XML elements to the correct location or locations in the answer area. Each XML element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

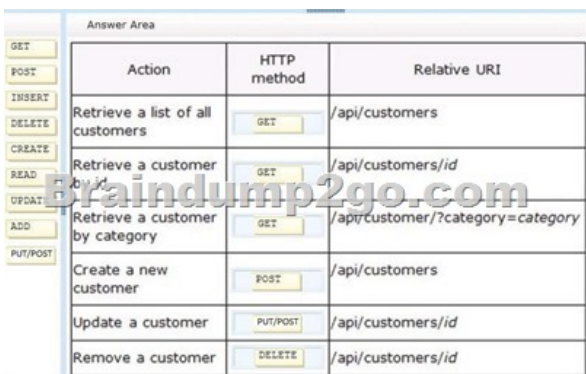

Answer:

QUESTION 5 You are planning to migrate websites from IIS 6 to IIS 7.5. You do not have access to SSH or a VPN. You need to select a deployment tool to securely migrate the websites. Which tool should you use? A. RoboCopy B. Web Deploy C. Microsoft command-line FTP D. xCopy
QUESTION 6 Drag and Drop Question You are developing an ASP.NET MVC Web API application. The method names of the Web API must match naming guidelines for RESTful services. You need to create methods to support standard insert, select, update, and delete operations in an HTTP service. What should you do? (To answer, drag the appropriate HTTP methods to the correct row in the table in the answer area. Each HTTP method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 7 You are developing an ASP.NET MVC application. Applications can be deployed to remote servers only by administrators who have elevated privileges. The administrators do not have access to Visual Studio 2012. You need to select a deployment tool to deploy the application to remote servers for testing. Which tool should you use? A. Copy Web Site Tool B. One-Click Publish C. Publish Web Site Tool D. Web Deployment Package Answer: D

QUESTION 8 You are developing an ASP.NET MVC web application that contains the following HTML: `<table id="customer"></table>` You also have an ASP.NET Web API application that contains a call for retrieving customers. You must send and retrieve the data in the most compact format possible. You need to update the HTML for the customers table to contain data from the Web API application. Which script segment should you use?

```
A. <script>
    $(function () {
        var $customers = $("#customers");
        $.ajax({
            url: "api/customers",
            dataType: "json",
            success: function (data) {
                ...
            }
        });
    });
</script>
```

B. <script>
 \$(function () {
 var \$customers = \$("#customers");
 \$.xml({
 url: "api/customers",
 dataType: "ajax",
 success: function (data) {
 ...
 }
 });
 });
</script>

C. <script>
 \$(function () {
 var \$customers = \$("#customers");
 \$.json({
 url: "api/customers",
 dataType: "ajax",
 success: function (data) {
 ...
 }
 });
 });
</script>

D. <script>
 \$(function () {
 var \$customers = \$("#customers");
 \$.ajax({
 url: "api/customers",
 dataType: "xml",
 success: function (data) {
 ...
 }
 });
 });
</script>

A. Option A B. Option B C. Option C D. Option D Answer: A

QUESTION 9 Drag and Drop Question You are developing an ASP.NET MVC Web API image management application. The application must meet the following requirements:- It must send or receive image data without the use of a buffer. - It must allow up to 4 MB of image data to be received. - It must allow up to 3 MB of image data to be sent. You need to complete the code to meet the requirements. What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

```
class Program
{
    private static string _baseAddress = "http://...";
    static void Main(string[] args)
    {
        var config = new HttpSelfHostConfiguration(
            config.Routes.MapHttpRoute(
                name: "DefaultApi",
                routeTemplate: "api/{controller}/{id}",
                defaults: new { id = RouteParameter.Optional }
            ));
        ...
        server.OpenAsync().Wait();
    }
}
```

Braindump2go.com

Answer:

```
config
server
MaxBufferSize
MaxReceivedMessageSize
MaxConcurrentRequests
Streamed
Buffered
```

```
Answer Area
class Program
{
    private static string _baseAddress = "http://localhost:8080/";
    static void Main(string[] args)
    {
        var config = new HttpSelfHostConfiguration(_baseAddress);
        config.Routes.MapHttpRoute(
            name: "DefaultApi",
            routeTemplate: "api/{controller}/{id}",
            defaults: new { id = RouteParameter.Optional }
        );
        config.MaxReceivedMessageSize = 1024 * 1024 * 3;
        config.MaxReceivedMessageSize = 1024 * 1024 * 4;
        config.TransferMode =
            TransferMode.Streamed;
        var server = new HttpSelfHostServer(config);
        server.OpenAsync().Wait();
    }
}
```

QUESTION 10 You are preparing to develop a set of libraries for a company. The libraries must be shared across the company. You need to create a remote NuGet feed that exposes the libraries. What should you do? (Each answer presents part of the solution. Choose all that apply.) A. Install the NuGet.Feed Package. B. Install the NuGet.Server Package. C. Configure the Packages folder located in the system.webserver section of the web application's Web.config. D. Create a new Empty Web Site in Visual Studio 2012. E. Configure the Packages folder located in the appSettings section of the web application's Web.config. F. Add packages to the Packages folder. G. Create a new Empty Web Application in Visual Studio 2012. Answer: BEFG Instant Download Braindump2go New Released Microsoft 70-487 Exam Dumps PDF & VCE!
